

Lehigh Astronomy Club presents
Professor Ginny McSwain
**“How to Schedule an Observing
Session”**

"What do you mean, you can't look
at the Milky Way because you're
lactose-intolerant?"

Learn when is the best time to plan night-time observing. You'll learn how to gather all the information necessary to make the most out of your night skies. And, most importantly, what's up in the sky at any given night to observe.

**LL 316 at 4:10 - 5 on Wednesday,
November 15th**
