

PHYSICS 363 - SOLID-STATE PHYSICS

Michael Stavola
Fairchild Lab 211
Telephone: 83946
e-mail: mjsa@Lehigh.edu

TEXT: *Elementary Solid-State Physics*, M. Ali Omar

The course will focus on material in the first 6 chapters of Omar's book.

Other noteworthy texts:

Introduction to Solid State Physics, 8th ed. Charles Kittel

Solid-State Physics, Neil Ashcroft and David Mermin

GRADING: two hour exams (50%), final (35%), homework (15%)

Initial competences:

Introductory quantum mechanics and thermal physics

Final competences:

Crystal lattices, Miller indices, and crystal structures

X-ray diffraction and the reciprocal lattice

Crystal binding and crystal types

Specific heat, lattice vibrations, neutron diffraction, thermal conductivity

Free electron theory of metals, electronic specific heat

Elementary theories of band structure, nearly free electron model, tight binding model

Semiconductor physics, electrons and holes, effective mass, simple devices

Accommodations for Students with Disabilities: If you have a disability for which you are or may be requesting accommodations, please contact both your instructor and the Office of Academic Support Services, University Center C212 (610-758-4152) as early as possible in the semester. You must have documentation from the Academic Support Services office before accommodations can be granted.

The Principles of Our Equitable Community:

Lehigh University endorses The Principles of Our Equitable Community

[http://www.lehigh.edu/~inprv/initiatives/PrinciplesEquity_Sheet_v2_032212.pdf]. We expect each member of this class to acknowledge and practice these Principles. Respect for each other and for differing viewpoints is a vital component of the learning environment inside and outside the classroom.
